

Majda Soussia

Software Engineering student passionate about Artificial Intelligence and Full-Stack Development, with hands-on experience building scalable web applications and deep learning systems using Python, React, Node.js, and PyTorch. Interested in AI-powered solutions, anomaly detection, and modern software engineering practices.

WORK EXPERIENCE

Mobelite Labs

Software Engineer Intern

July 2025 - August 2025

- Developed a responsive web application for a movie catalog using React, improving user interaction and UI performance
- Designed and implemented a content-based recommendation engine using Python and machine learning techniques to personalize movie suggestions
- Built and integrated backend services using Node.js, Express, and MongoDB, ensuring efficient API communication
- Collaborated on full-stack development to deliver a scalable and maintainable application

EDUCATION

National School of Computer Science (ENSI)

Engineering Degree in Software Engineering

September 2024 - July 2027

Preparatory Institute for Engineering Studies of Monastir (IPEIM)

Pre-Engineering in Technology (PT) - 62/711

September 2021 - July 2022

PROJECTS

Anomaly Detection System for Elderly Monitoring

January 2026 - May 2026

- Designed and developed an intelligent system to detect abnormal behavioral patterns in elderly activity data
- Built and trained a deep learning model using PyTorch for anomaly detection with high accuracy
- Processed and analyzed datasets to model normal behavior and identify deviations
- Developed a web-based interface for real-time data visualization and monitoring
- Integrated the solution into a full-stack system for efficient data handling and analysis

E-Commerce Platform

January 2025 - May 2025

- Developed a responsive e-commerce platform using HTML, CSS, and JavaScript
- Implemented backend functionality using PHP and MySQL for managing products, users, and orders
- Designed intuitive user interfaces to enhance user experience and usability
- Built core features including authentication, shopping cart, and product management

Store Management Desktop Application

September 2024 - December 2024

- Designed and developed a C-based software for managing inventory and sales in a general store
- Implemented file-based data storage to track stock levels and transaction history

SKILLS

Programming: Python, JavaScript, SQL, C/C++, Java, PHP

Web Development: React.js, Node.js, Express.js, HTML, CSS

Databases: MongoDB, MySQL, PostgreSQL

AI & Data Science: Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib

LANGUAGE

English B2

French B2

LEADERSHIP EXPERIENCE

IEEE ENSI Student Branch – Active Member
